this program should they decide
to participate.

One Technology Plaza
Workforce Network
Conference Room
211 Fulton St., Suite 300
8:30 a.m. – 10:00 a.m.

JobFit is a multi-purpose assessment that is used for selection, coaching, training, promotion, managing, and succession planning. The tool creates a Job Match Pattern to benchmark the job-related qualities that make a person productive * Thinking and Reasoning Style, Behavioral Traits, and Occupational Interests. It is a powerful and dynamic management tool that employs 21st Century technology to put the right people in the right jobs. It is administered on the Internet and reports are immediately available.

Job Match Patterns are effective because they compare the qualities of your job candidates to the attributes of your most productive employees. The patterns tell you whether candidates are like or different from your top performers. A study published in the Harvard Business Review concluded that Job Match more accurately predicts job success than any of the commonly accepted factors, such as education, experience, or job training. Matching people so they fit the work they do builds productivity and job-satisfaction and diminish negative factors such as stress, tension, conflict, miscommunication, and costly employee turnover.
